

EuroGEOSS on-line tutorials 2010

EuroGEOSS offers a series of on-line tutorials/lectures for both technologists and users.

The presentations focus on the core areas of EuroGEOSS – forestry, drought and drought along with the challenges of integrating information from these themes into coherent information for use in applications and decision-making. Cross-cutting societal benefits will also be addressed.

Online tutorials/lectures will be produced by using the conferences materials (video, audio, presentation material, interviews, hands-on demonstrations...).

The tutorials/lectures will be available on the web during third quarter of 2010. The following are planned for the 2010 series:

- GEOSS Perspectives Alan Edwards
- EuroGEOSS – a demonstration Program Max Craglia
- 2010 the Year of Biodiversity Bob Scholes
- Global Perspective on Drought Mark Svoboda
- Global Approach on Forestry Roman Michalak
- Multi-disciplinary Interoperability: the EuroGEOSS Operating Capacities Stefano Nativi
- EuroGEOSS for Biodiversity – New Approaches to Monitoring and Forecasting at the Global Scale Stephen.Peedell
- Drought Stefan Niemeyer
- EuroGEOSS Forestry Operating Capacity - status and outcomes Gerimantas Gaigalas
- Cross-cutting Benefits of GEOSS Steffen Fritz
